PROFILE

With over 3 years of experience in front-end development, I specialize in React, Next.js, node.js, nestjs, java and springboot, with a proven track record of delivering high-quality, user-centric solutions. My passion for technology drives me to explore innovative approaches, leading to significant improvements in user engagement and project outcomes.

WORK EXPERIENCE

Feb 2024 - PRESENT

London, United Kingdom

Full Stack Java Developer

- Developed a scalable and robust e-commerce platform.
- Utilized modern technologies for high performance and reliability.
- Ensured secure transactions and efficient operations.
- Delivered a user-friendly experience with advanced admin tools.

PROJECTS

Focusspark: A custom-developed static site using Next.js, optimized for fast performance, SEO, and a streamlined user experience. **Skills:** Backend Nestjs and Supabase, Typescript, Markdown, Contentlayer, Framer-motion and NextAuth.js

Agency Tourism App: This tourism app uses Java with Spring Boot and Security for a robust backend, and React with React Router, Semantic UI, and React Query for the frontend. PostgreSQL manages data, with Formik for forms and Axios for API requests, all documented and tested via Swagger and Postman.
